Description

This 10x2.75/2.50 inner tube (innertube) with angled valve stem (for straight valve stem see product numbers 40D2035 and 40D2040) is frequently used for 2.50-10 and 2.75-10 series tires. This size of tube is most popularly (though not exclusively) used for gas and electric scooters, mobility scooters, electric wheelchairs and a variety of other powersport and personal transportation applications.
