Description

This cable is most commonly (though not exclusively) used for ATVs, dirt bikes, scooters and other powersports products. Primarily of displacements within the 50cc to 250cc range (50cc 70cc 90cc 110cc 125cc 140cc 150cc 200cc 250cc). As a result of its length this throttle cable in particular is most commonly known for its application in dune buggies, such as the 110cc, 125cc, 150cc, 200cc and 250cc models.
